

Every cow enjoys this fresh feed and will thank that with an increased milk production.

MAMMUT

feed refresher Fortuna

technical data

machine width	135 cm
attachments	three-point, div. additions possible
weight	350 kg
oil consumption	from 30 l/min.

standard equipment

hydraulic engine
bottom clearing border
deflector plate
three feeler wheels

accessories

several attachment options and adapter
concentrate container
molasses container
two-sided clearing

The Power Brand

pushing feed
easily

What has happened so far...

Pushing feed has always been a laborious manual task so far. Therefore creative farmers and the industry kept coming up with new ideas. There was the tire-pusher, which only compressed the feed and roughend the concrete floor. The transformed snow plough was not any better.

an effortless future

MAMMUT's Fortuna makes pushing the feed an easy chore. Hereby the feed gets loosened up.

A drum with a conveyor screw transports pushed aside feed back to the feeding table.

- + Constant mixing and air circulation while pushing feed.
- + The loosened presenting is ideal for ruminants.
- + The feed reserves it's fresh flavor and is free from pollution.
- + Secondary fermentation and loss of quality is avoided by not compressing the feed
- + The floor in the feed alley is clean, the concrete is protected.

All in all the animals are eating more basic fodder and are improving the milk and meat production.

= MORE PROFIT.

Control of the livestock

Using automatic tools, you are easily tempted to avoid as many manual tasks as possible. By handling chores with Mammut Fortuna you still keep an eye on your livestock.

Reduced workload – more control

Clean pushing of feed with ideal loosening of the silage.

Perfectly clear feed alley because of feeler wheels.

For many carrier vehicles

The standard feed refresher is equipped with a three-point attachment. The standard application can not only be used on a tractor, but also on farm loaders, wheel loaders and on front loaders.

Finishing more tasks without any more effort

For even more efficient operation, we have developed a version of Fortuna with a two-sided clearing, which, of course, depends on the width of your feed alley.

We also offer Fortuna with a concentrated feed dosing instrument, so the animals get concentrated feed throughout the whole day and are getting encouraged to eat more.

Even a container for the addition of sugar melasses can be attached on top.

“Pushing the feed is now real fun!”

Johann Deutinger from Gurten used the vicinity to us and got one of the first Fortuna feed refreshers

“I never expected how fast and clean it pushes the feed.

Because of the good mixing, the cows cannot search for any tidbits any longer.

The feed is more homogeneous, the cows eat more continuously and everything just goes smoother.”
